

**UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
REGION III
1650 Arch Street
Philadelphia, Pennsylvania 19103-2029**

Mr. Patrick McDonnell, Secretary
Pennsylvania Department of Environmental Protection
400 Market Street
Harrisburg, PA 17101

Dear Secretary McDonnell:

By letter and enclosure dated February 20, 2018, the Pennsylvania Department of Environmental Protection (PADEP) submitted to the U. S. Environmental Protection Agency (EPA) requesting concurrence with PADEP's proposal to exclude data associated with exceptional event episodes for 8-hour ozone data influenced by the Fort McMurray wildfire on May 24, 25 and 26, 2016. PADEP determined that the Fort McMurray caused elevated ozone concentrations at 43 monitors throughout Pennsylvania.

In 2016, EPA revised the Exceptional Events Rule (EER) found in §50.14 and §51.930 of 40 CFR Parts 50 and 51 of the Clean Air Act. See "Treatment of Data Influenced by Exceptional Events," 81 FR 68216 (October 3, 2016). After careful consideration of the information provided, EPA concurs on 8 monitor days, defers action on 41 monitor days, and non-concurs on 78 monitor days, based on the weight of evidence that the agency has made in the demonstrations referred to in 40 CFR 50.14(a)(2) and (b)(1). EPA's decisions are summarized in the attached table. In addition, PADEP has met the schedule and procedural requirements in section 50.14(c) with respect to the same information. The basis for our concurrence is set forth in the enclosed technical support documents. My staff has entered, or shortly will enter, "concurrence flags" for these data into EPA's Air Quality System data repository.

The 2016 rule revisions 40 CFR 50.14(a)(1)(i) limit the applicability of the EER to National Ambient Air Quality Standards (NAAQS) exceedances or violations which have relevance to specific regulatory determinations by EPA. The 8-hour ozone concentrations measured at the monitors marked with "Defer" in the attached table, do not currently have regulatory significance and EPA will defer action at this time. EPA will retain PADEP's demonstrations for future consideration should any of the data on which EPA is deferring action at this time become significant for a future regulatory action.

The 8-hour ozone concentrations measured at the monitors marked with "Non-concur" in the attached table, did not have exceedances of the NAAQS on the requested dates, or do not have current or projected future regulatory significance. Exclusion of the requested 8-hour ozone data from these monitors does not result in one or more of the following:

- 2016 or 2017 design value attainment of NAAQS
- Change in 2016 4th highest 8-hour ozone concentration

*Printed on 100% recycled/recyclable paper with 100% post-consumer fiber and process chlorine free.
Customer Service Hotline: 1-800-438-2474*

Therefore, EPA non-concurs with PADEP's request for exclusion of data from these monitors.

EPA's concurrence is a preliminary step in the regulatory process for actions that may rely on the dataset containing the event-influenced data and does not constitute final agency action. If EPA takes a regulatory action that is affected by exclusion of the ozone data for the May 24, 25 and 26, 2016 events, EPA intends to publish notice of its proposed action in the Federal Register. EPA's concurrence letter and accompanying technical support documents will be included in the record as part of the technical basis for that proposal. When EPA issues that regulatory action, it will be a final agency action subject to judicial review.

If you have any questions or wish to discuss this matter further, please have your staff contact Kinshasa L. Brown, EPA's Pennsylvania Liaison, at (215) 814-5404. For questions regarding this approval action, your staff may contact Ms. Alice H. Chow, Associate Director of the Office of Air Monitoring & Analysis, (215) 814-2144.

Sincerely,

Cosmo Servidio
Regional Administrator
